

Merry go Round

*Once
Upon
a Time*

IE PARK is a leader in the design and production of carousels and has been supplying such rides to clients around the world for many decades. Traditional horse carousels, multi-animal/toy carousels and themed carousels are all built at the company's headquarters in Gattatico, where the company's technical expertise coupled with the use of the latest engineering technology and construction methods, are combined with the skills of dedicated artists, sculptors and painters to build a range of best-selling carousels in many different diameters – including 3m., 5m., 6m., 7m., 8.5m., 9m. and 10.5m.

Carousels have been one of the most popular types of amusement ride for centuries and IE Park's experience in supplying its varied range to customers with many different requirements has given the company a valuable insight into why these rides continue to be so popular, both with operators and riders. Carousels were one of the original amusement rides and have a wonderful history. Today examples can be found operating in amusement and theme parks, on travelling fairgrounds and carnivals, in family entertainment centres, shopping malls, children's entertainment centres, zoos and many more venues. They are also very popular and successful as stand-alone attractions, such is their appeal.

They are considered one of the staple attractions of the amusement ride industry because they are enjoyed by such a wide age range, from the very young to grandparents, who are all able to enjoy the experience of riding a horse, a cockerel, in a carriage or even an exotic creature such as a tiger or bear.

The magic of the Carousel

People of all ages can let their imaginations run wild as they ride the merry-go-round with its unique, fun motion.

Another key aspect of riding a carousel is that they can be enjoyed by all the family, together. In today's society when families so often do very little collectively, a ride on a carousel can bring the family group, of all ages, together to enjoy a fun-filled experience. All generations can enjoy the carousel and we often see young children, perhaps their older siblings, parents, grandparents and other friends and relatives sitting on a figure for a nostalgic and enjoyable experience – together.

For many a ride on a carousel is often the first and last amusement ride experience they have. For youngsters, it provides them with some of their first thrills on a ride, while for the older generations it can take them back in time for some wonderful memories as they enjoy another ride. Carousels are an endearing amusement attraction and will remain so long into the future in all their various guises.

Merry go Round

*Attention to detail is a priority where IE Park is concerned;
theming is an important aspect in the development and production of each ride.*

*Local Italian artists paint each carousel, but more recently aerographic design has been introduced with advanced technology.
Additionally, all manufacturing takes place on-site and each decorative panel is made using the strongest fiberglass.*

*A combination of steel, aluminium and wood makes up the structure of each carousel bringing it in
line with standard EN13814-2004, ensuring a high quality product every time.*

*In addition to the existing range of quality carousel rides and attractions,
IE Park receives many requests for larger and two storey carousels. A bespoke design service
is available for new projects to all its clients.*

The Story has begun...

*In accordance with the Millennium being dedicated to the “Year of the Carousel”,
IE Park has re-created and designed a new model for the carousel range.*

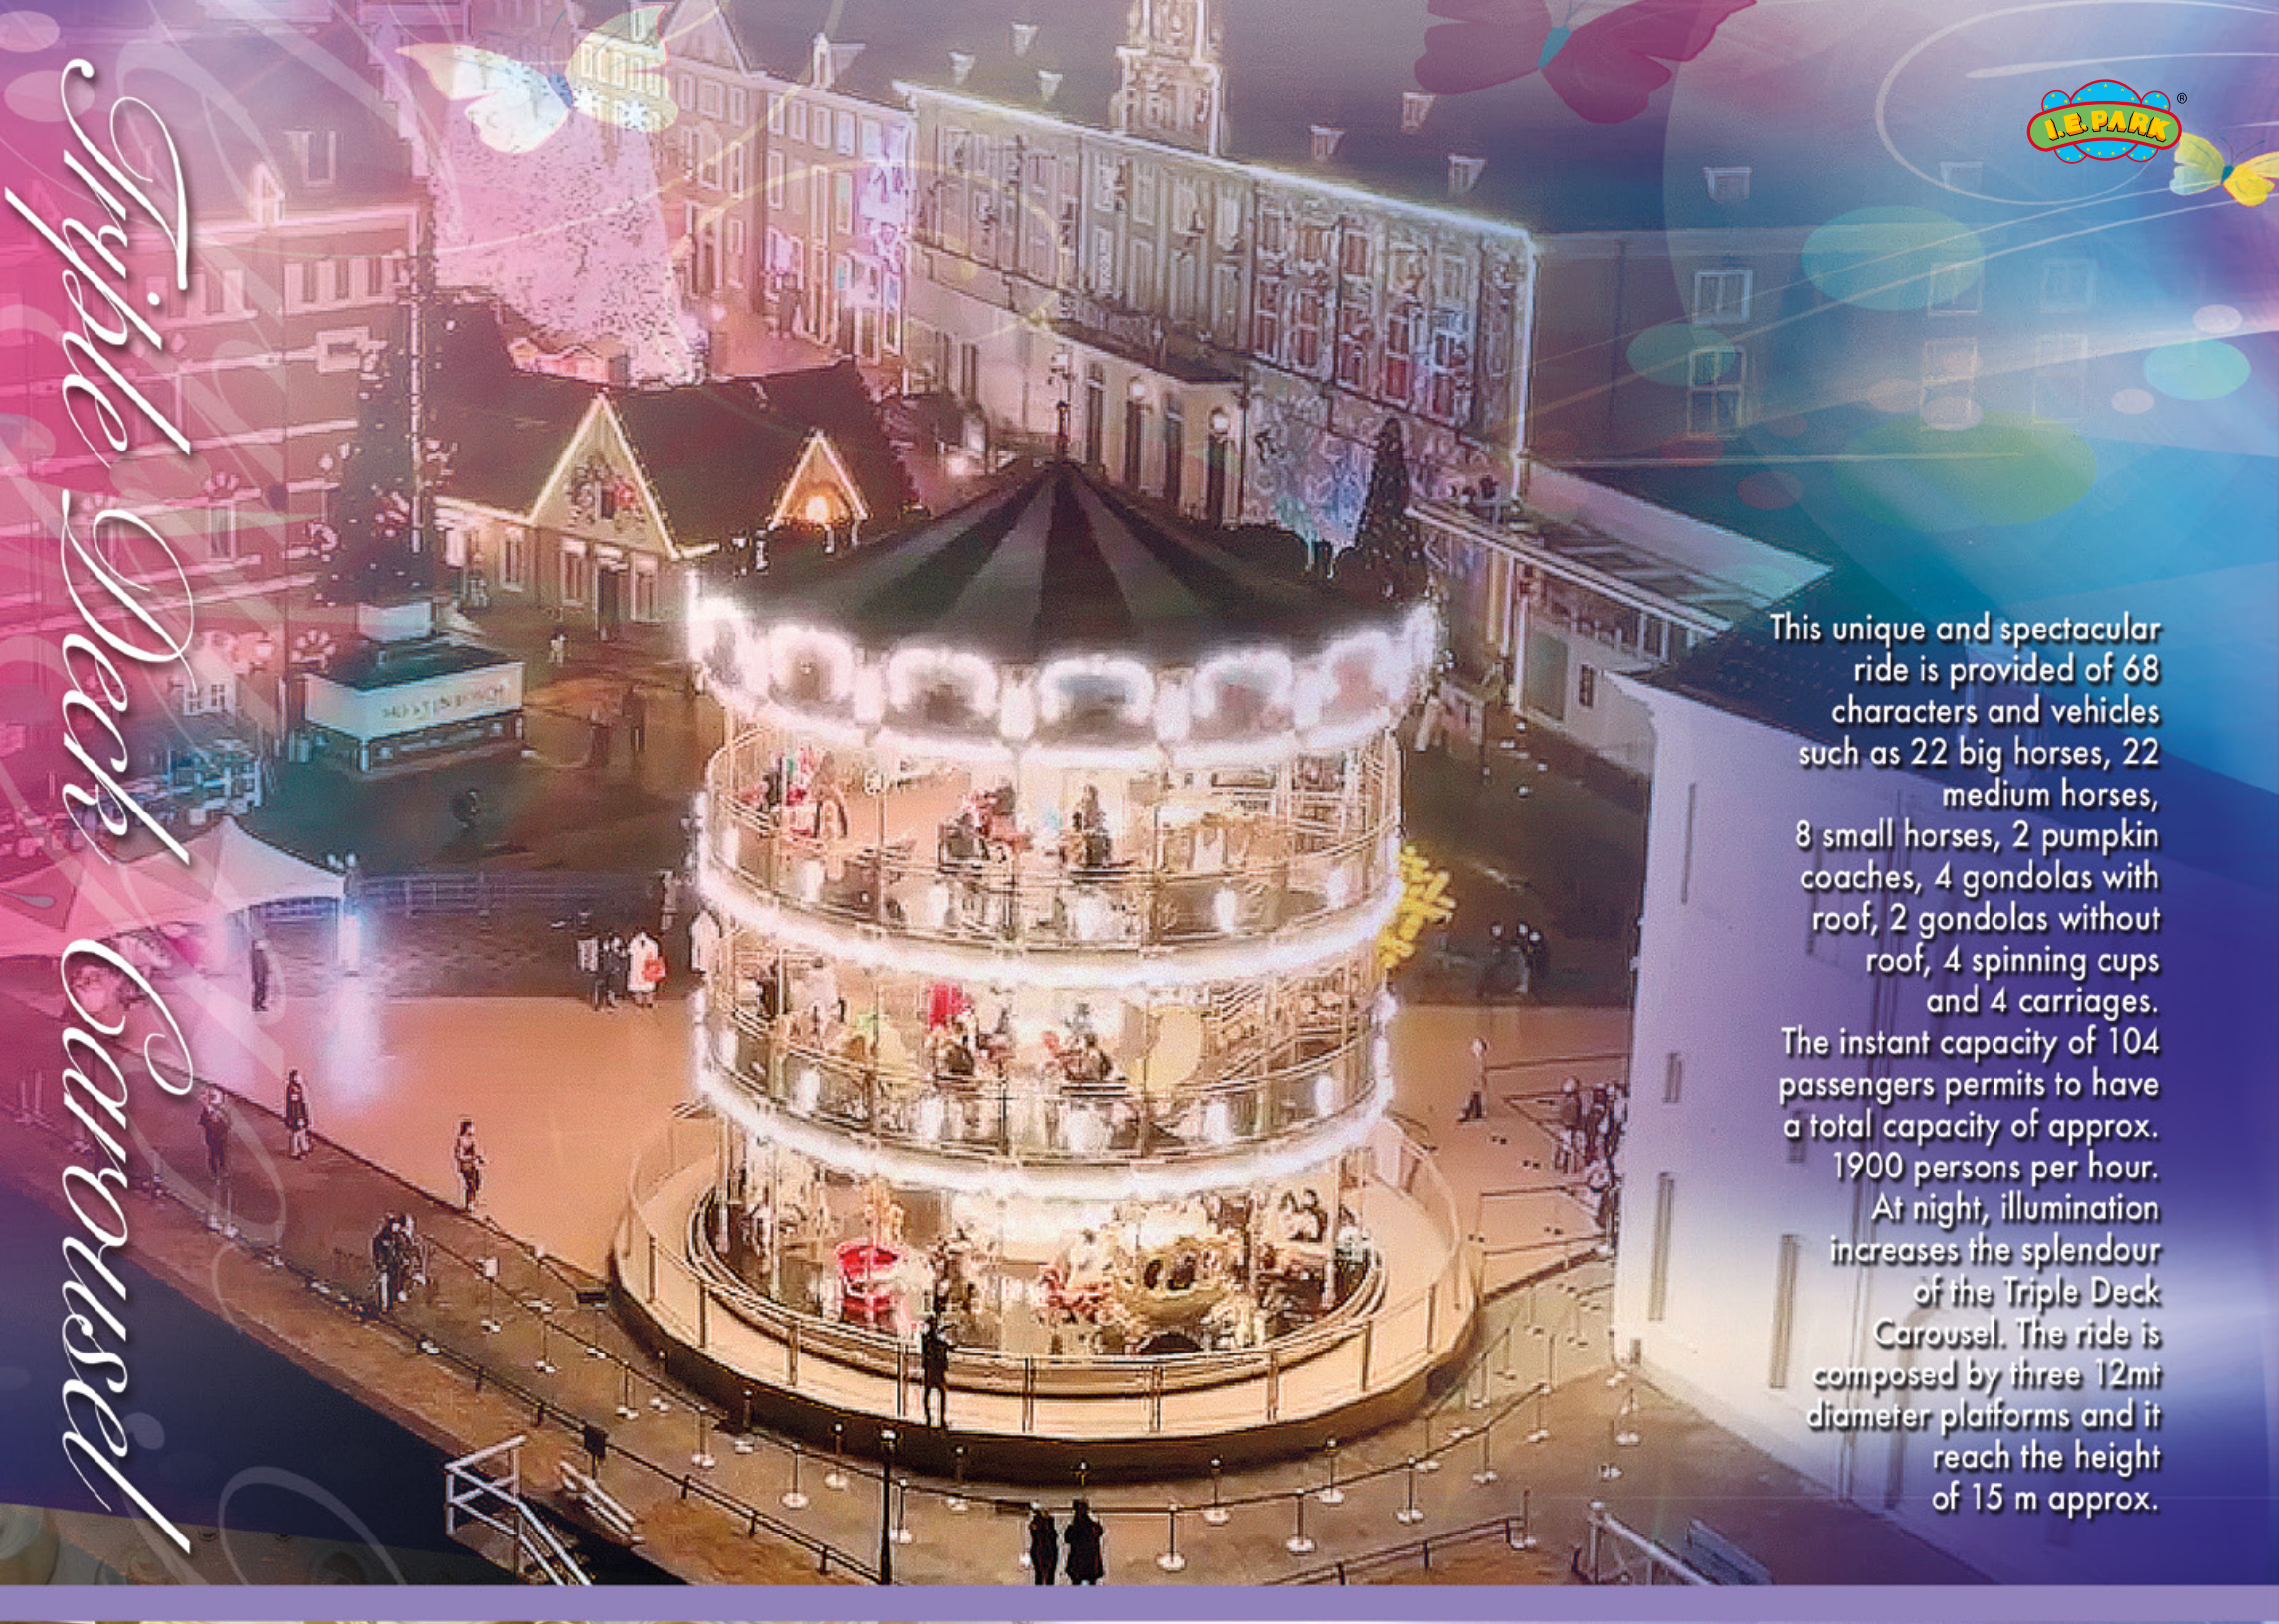

*With much thought and emphasis on theming, the new “Legend of the Sea” will incorporate submarines, giant octopuses and sea horses.
The concept has been well received by the leisure market, in addition to the interest shown by existing clients.*

IE Park anticipate many orders for their new range.

*With much history attached to the Carousel, it is not surprising to find this type of attraction in most,
if not all theme parks, shopping centres and FEC's.*

The Carousel truly is a ride that attracts much interest.

*IE Park have become renowned for quality, innovative design, durability and safety,
which have ensured it's worldwide success.*

Triple Deck Carousel

This unique and spectacular ride is provided of 68 characters and vehicles such as 22 big horses, 22 medium horses, 8 small horses, 2 pumpkin coaches, 4 gondolas with roof, 2 gondolas without roof, 4 spinning cups and 4 carriages. The instant capacity of 104 passengers permits to have a total capacity of approx. 1900 persons per hour. At night, illumination increases the splendour of the Triple Deck Carousel. The ride is composed by three 12mt diameter platforms and it reach the height of 15 m approx.
